Guide to Build Websites with AI

Your Website. Done in Minutes. Actually Easy..

Fast. Affordable.

Launch your site in 10 minutes — no coding, no stress, no big budgets.

Rodolfo Alvarez

Who Needs a Website?

Business Owners

Establish your brand's home online. Customers expect professional websites before trusting businesses.

Freelancers & Creatives

Showcase your portfolio to attract clients. Your website serves as a 24/7 sales representative.

Content Creators

Unify your digital presence. Direct followers to one hub for all your content.

Entrepreneurs

Launch your idea with credibility. A professional website signals you're serious about your venture.

Your online presence isn't optional anymore—it's essential. Now is your moment to shine.

Why a Website Matters

Global Reach

Connect with customers worldwide

Builds Trust

Professional presence enhances credibility

Increases Visibility

Help customers find you easily

Boosts Marketing

Platform for promoting products/services

With vs. Without a Website

With a Website

- Global reach to customers across different countries and time zones
- Builds credibility and trust with potential clients and partners
- Easily discoverable through search engines and online directories
- Enables effective digital marketing and promotional campaigns
- Maintains competitive edge in today's digital marketplace

Without a Website

- Limited to local customers within physical reach of your business
- Appears outdated and unprofessional to tech-savvy consumers
- Difficult for new customers to find information about your offerings
- Misses valuable online marketing and sales opportunities
- Falls behind competitors who leverage digital presence effectively

Basic content of every website

Homepage

Create welcoming entry point, letting our audience know who you are and why are you different from the competition

About Us

Share your story and values, mission and vision

Products/Services/Portfolio/Educational

Showcase what you offer

Contact Form

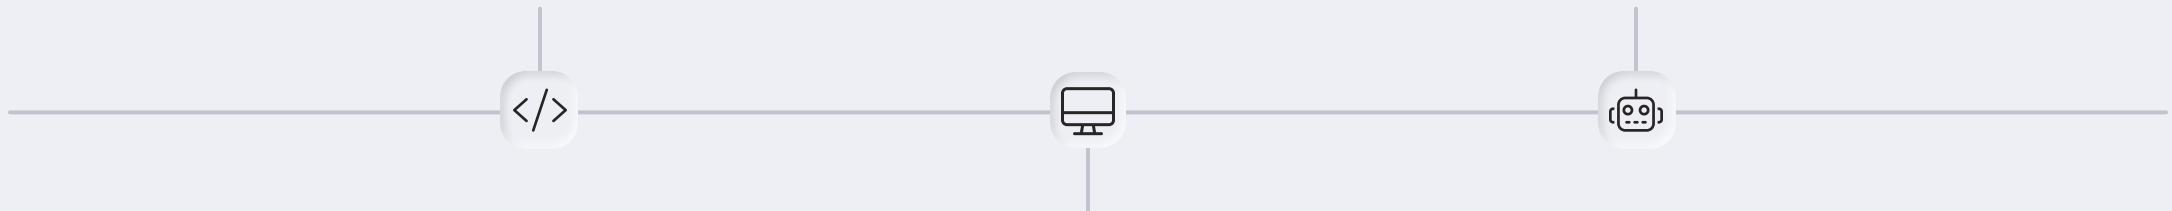

Make connection easy

The screenshot shows the homepage of a website for "Nurturing Nature". The header features a navigation bar with links for Home, About, Contact, Products (with a dropdown arrow), a green button for "Build Your Plant", and a shopping cart icon. The main visual is a dark, moody photograph of various dried and preserved plants, including eucalyptus leaves, red berries, and pine branches. Overlaid on this image is the text "Bringing life and sustainability to your spaces" in large white font, followed by a subtitle "Transform your space with our unique upcycled plant centerpieces." At the bottom left, there is a green call-to-action button with the text "Shop Now" and a right-pointing arrow.

Evolution of Website Building

Beginning (1990s-2000s)

Very hard. Required extensive HTML, CSS, and JavaScript knowledge.

Previously (2000s-2023s)

Not too hard. Visual editors and templates emerged.

Today

Very easy. AI-powered tools create professional websites quickly.

AI Website Building Tools

Ready to start building with AI? These top platforms make website creation faster and more intuitive than ever before.

Rank	Tool	Pricing	Complexity	Link
1	Replit	Free / \$15/month	Beginner-Intermediate	replit.com

To Start With Replit.com

The best way to start a website is to have your content ready first.

I recommend using a general AI model to create compelling content that:

- Appeals directly to your target customers
- Aligns with your brand identity
- Resonates with your demographic
- Saves time in the development process

Content-first approach ensures your design serves your message, not the other way around.

Q ↑ ⌂ R

Okay, ChatGPT, what I want you to do is to create a nice, beautiful website for a clothing store. Now, this clothing store has a niche, and the niche is that we are fully into customization, we are fully into you coming to your business, and we and if you get exactly what you want. So that is going to be our niche, that is going to be our branding. Everything has to be super well targeted for our clients, clients that are looking for customization, personalization, but they are also looking to have a great experience at the boutique, right? So what I want you to do is create the general content of an entire website. I want to see my homepage, I want to see my About Us page, and I also want to see my products online and a contact page. So that is what I want to see. the name is fun things apparel

Step into our boutique and dive into the joy of customization! Work with our friendly design experts in a warm, creative space to bring your ideas to life. Feel the fabrics, explore samples, and watch your vision take shape.

[Include an image of the boutique if possible]

Customer Testimonials:

- "Designing my custom jacket at Fun Things Apparel was a blast! The staff made it so easy, and I love the result!" – Sarah K.
- "This is where fashion dreams come true. Amazing quality and such a fun experience!" – Mike T.

About Us Page

Heading:

About Fun Things Apparel

At Fun Things Apparel, we're passionate about fashion that's personal. Our story began when our founder, [Name], couldn't find clothing that truly expressed their individuality. That sparked a mission: to create a place where everyone can design apparel that's 100% *them*. We're here to fill the gap with fully customizable clothing and a shopping experience that's as enjoyable as the final product.

Fashion should be fun—that's our belief! Whether you're designing online or visiting our boutique, we aim to bring joy to every step. Our team is obsessed with making your experience unforgettable, from the first sketch to the moment you wear your creation.

Our Commitment:

We use only the best materials and partner with skilled artisans to ensure every piece is a masterpiece. Quality and customer happiness are at the heart of everything we do.

The Boutique Experience:

Our boutique is where creativity comes alive! Drop by to work one-on-one with our design pros, touch the fabrics, and see your ideas take form. With a welcoming vibe and expert guidance, it's the perfect spot to craft something extraordinary.

Products Page

Heading:

Our Customizable Products

With Fun Things Apparel, your imagination sets the limit! Browse our customizable clothing options and start designing online—or visit our boutique for an even deeper experience. Here's what you can create:

Custom T-Shirts:

Get creative with your own t-shirt! Use our simple online tool to pick colors, fabrics, and fits, then add graphics, text, or images that scream *you*.

Personalized Hoodies:

Cozy up in a hoodie made just for you. Choose your style, color, and size, then customize it with designs or messages that tell your story.

Bespoke Dresses:

Design your dream dress with our expert tailors. From fabric to fit, every detail is up to you—perfect for that special occasion or everyday flair.

Access Replit.com

1. Sign up
2. Enter the prompt with the content of the your desired website

Modify your website until you are satisfied

The screenshot shows a developer interface with two main panes. On the left, the Replit workspace displays a terminal session with logs of code changes and deployment steps. Key logs include:

- [plugin:runtime-error-plugin] The requested module '/@fs/home/runn.../node_modules/vite/deps/lucid-react.js?=.66c55c8' does not provide an export named 'Pinterest'
- I see the issue. We still have another reference to the 'Pinterest' icon in a different file. Let me find and fix that too:
- Opened client/src/components/Layout/Footer.tsx
- Now I'll update the Footer.tsx file to replace Pinterest with YouTube:
- Edited client/src/components/Layout/Footer.tsx
- Now I also need to update the Pinterest icon instance in the footer:
- Edited client/src/components/Layout/Footer.tsx
- Let's check if the application is running properly now:
- Restarted Start application
- Took a screenshot
- Checkpoint made 5 hours ago • f1c4c180
- Implement initial front-end for Fun Things Apparel e-commerce website, including home, about, products, and contact pages.
- Rollback to here
- I've fixed the missing icon issue by replacing the non-existent Pinterest icon with the YouTube icon from lucide-react in both the SocialLinks and Footer components. Can you confirm if the application is now running without errors?
- run the website Just now
- The website is already running! Let me show you what it looks like and confirm that our icon fix is working correctly.
- Took a screenshot
- Thinking... II Pause
- Message Agent...
- Have feedback? ➔

On the right, the browser window shows the live preview of the "Fun Things Apparel" website. The homepage features a hero section with the text "Your Style, Your Way" and "Custom Clothing, Crafted for You". It includes a call-to-action button "Start Designing Now" and a banner stating "100% Personalized". Below this is a "Featured Products" section with three items: "Custom T-Shirts" (showing a row of green shirts), "Personalized Hoodies" (showing a person wearing an orange hoodie), and "Bespoke Dresses" (showing a person in a long pink dress). The top navigation bar includes links for Home, About, Products, and Contact.

Deploy your website

1. Click deployment tap on the left side
2. Deploy, Now you successfully launched your website!

The screenshot shows the Replit development environment. On the left, there's a sidebar with various icons and a message from an AI agent. The main area displays a deployed web application for "Fun Things Apparel". The app's homepage features the title "Your Style, Your Way", a subtext "Custom Clothing, Crafted for You", a "Start Designing Now" button, and a "100% Personalized" badge. To the right is a flat-lay image of clothing items like a red beanie, a grey sweater, jeans, and a watch. At the bottom, there's a "Featured Products" section with blurred images. A purple banner at the bottom of the screen says "The agent needs your feedback."

This screenshot shows the "Deployments" tab in the Replit interface. It displays the "Production" environment. The status is shown as "Rodolfo deployed about 5 hours ago". The domain is listed as "https://funthingsapparel.replit.app". The type is "Autoscale (4 vCPU / 8 GiB RAM / 3 Max)". There are buttons for "Redeploy", "Edit commands and secrets", and "Manage See all usage". The sidebar on the left is identical to the previous screenshot, showing the AI agent's message.

Connect domain address (Eg. "Funthingsapparel.com")

1. Look for your domain availability in [godaddy.com](#) (or other domain platform).
2. If available, buy/secure domain

The screenshot shows the GoDaddy domain search results for the query "funthingsapparel.com". The search bar at the top contains the text "funthingsapparel.com". To the right of the search bar are three buttons: a magnifying glass icon, a blue "Continue" button with a checkmark, and a black "Start with AI Domain Search" button with a pencil icon.

Below the search bar, there are navigation links: "RESULTS" (highlighted in green), "FILTER", "FAVORITES", and "HISTORY".

The search results are displayed in two columns:

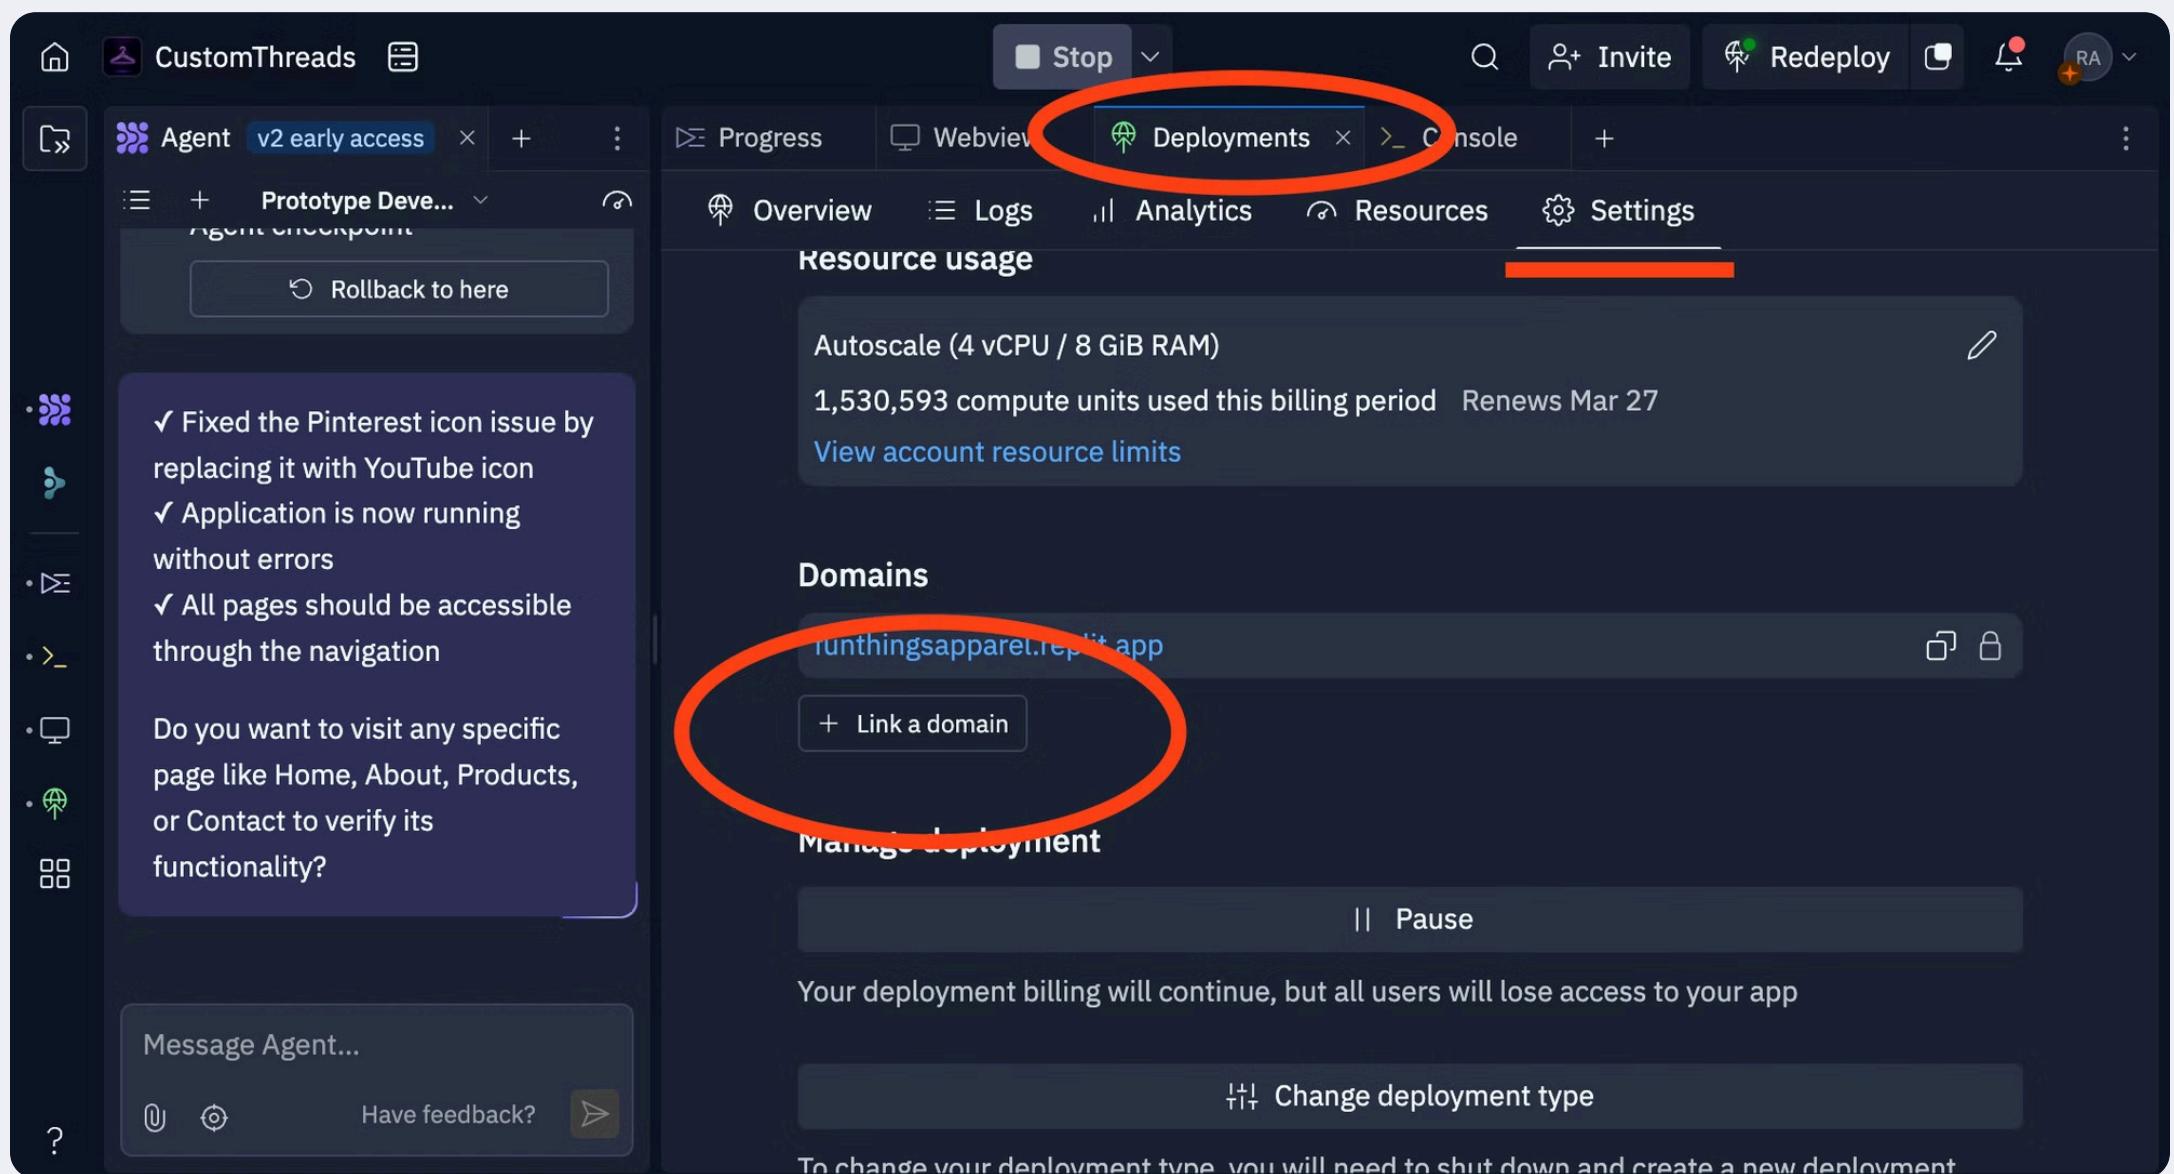

- EXACT MATCH**:
The first result is "funthingsapparel.com". It is listed under the "Basic Domain" category. The price is \$21.99, but it is highlighted in red as \$0.01. A note below says "1st yr only with 3 yr term".
Buttons: "Register Domain" (disabled), "Learn More", and "Contact Us".
- GoDaddy Airo EXACT MATCH**:
The second result is "funthingsapparel.com". It is listed under the "Domain++ (Includes Basic Domain and Airo!)" category. The price is \$21.99, but it is highlighted in red as \$0.01. A note below says "1st yr only with 3 yr term".
Buttons: "Make It Yours" (disabled), "Learn More", and "View Cart".

At the bottom left, it says "1 item" and "Subtotal: \$43.99". At the bottom right, there is a "Looks Good, Keep Going" button with a shopping cart icon.

The URL in the browser's address bar is: https://www.godaddy.com/domainsearch/find?domainToCheck=funthingsapparel.com&tmskey=sem_godaddy_brand#

Now that your domain is secured, let's hook it to your website

1. Go to replit
2. Inside "Deployments" tabs
3. **Go to settings**

1. Enter your domain: "Funthingsapparel.com"
2. Get DNS values (sounds complicated, but it is not)
 - a. Don't click "Link domain" yet

The screenshot shows the Replit deployment interface. The top navigation bar includes 'Stop', 'Invite', 'Redeploy', and 'RA'. Below the navigation is a tab bar with 'Progress', 'Webview', 'Deployments' (selected), 'Console', and a '+' button. The main area is titled 'Domains' and shows a single entry: 'funthingsapparel.replit.app'. Below this is a field labeled 'First, enter your domain' containing 'Funthingsapparel.com', which is highlighted with a blue border. There are 'Cancel' and 'Next →' buttons at the bottom of this field. To the left, a sidebar lists several items with checkmarks: 'Fixed the Pinterest icon issue by replacing it with YouTube icon', 'Application is now running without errors', 'All pages should be accessible through the navigation', and a question about visiting specific pages like Home, About, Products, or Contact. At the bottom of the sidebar are 'Message Agent...', 'Have feedback?', and a help icon.

This screenshot shows the 'Link domain' step of the deployment process. The top navigation bar includes 'Overview', 'Logs', 'Analytics', 'Resources', and 'Settings' (selected). Below the navigation is a 'Domains' section with the entry 'funthingsapparel.replit.app'. A modal window is open, starting with the message 'First, enter your domain' and the domain 'funthingsapparel.com'. Below this, a note says 'Next, add the following records to your domain's DNS settings.' with a 'Learn more' link and a 'JSON' button. Two records are listed: an 'A' record with 'Hostname @' and 'Record 34.111.179.208', and a 'TXT' record with 'Hostname @' and 'Record replit-verify=3ddc82c5-7951-426'. At the bottom of the modal are 'Cancel' and 'Link domain' buttons. Red arrows point to the 'A' and 'TXT' input fields. The bottom of the screen shows a 'Manage deployment' section with a 'Pause' button and a note about changing deployment type.

Navigate back to godaddy.com and replace the values

1. Go to back to godaddy.com
2. Open your domain Funthingsapparel.com detail inside
3. Find "DNS Settings"
4. Replace the values
 - a. Make sure the is only **ONE** of each records inside (Type A, TXT)
 - b. Pro tip: if you are taking too long, contact godaddy customer service and give them the replit values they will added for you

The screenshot shows the GoDaddy domain dashboard for the domain 'Zone 9 Solar'. At the top, there's a renewal notice for \$21.99/yr. Below it, there are buttons for 'Manage DNS', 'Domain Settings', and 'Forward Domain'. A red circle highlights the 'Manage DNS' button. The main area displays domain protection options and a price summary: \$17.23 for the first year, plus \$164.96 for zone9solar.net + zone9solar.info + zone9solar.xyz + zone9solar.store. There's also a search bar at the bottom.

The screenshot shows the 'DNS' section of the GoDaddy dashboard. It includes links for 'Domains', 'Portfolio', 'Transfers', 'Services', 'Settings', and 'Activity Log'. On the right, there's a 'New Records' form for adding an A record. The form fields are: Type (A), Name (@ or www), Value (XX.XX.XX.XX), and TTL (1/...). A red box highlights the 'Value' field. At the bottom right of the form, there's a 'Save' button, which is also highlighted with a red box.

Ready to enjoy your custom domain?

1. Click "Link domain"

The screenshot shows the Replit interface during a deployment process. The top navigation bar includes tabs for Agent (v2 early access), Progress, Webview, Deployments (selected), Console, Overview, Logs, Analytics, Resources, and Settings. A sidebar on the left lists deployment logs:

- ✓ Fixed the Pinterest icon issue by replacing it with YouTube icon
- ✓ Application is now running without errors
- ✓ All pages should be accessible through the navigation
- Do you want to visit any specific page like Home, About, Products, or Contact to verify its functionality?

A message at the bottom says "Agent is waiting for your response" and "Message Agent...".

The main content area is titled "Manage deployment" and displays the "Link domain" step. It shows the domain "funthingsapparel.com" entered in a field. Below it, instructions say "Next, add the following records to your domain's DNS settings." It provides two records:

Type	Hostname	Record
A	@	34.111.179.208
TXT	@	replit-verify=3ddc82c5-7951-426

At the bottom of this section is a blue button labeled "Link domain" with a link icon, which is highlighted with a red box.

At the very bottom of the screen, a message says "Your deployment billing will continue, but all users will lose access to your app".
